

Phase 10 Masters Edition Card Game

My friend and I are obsessed with this game. We loved normal phase 10 and she downloaded the phase 10 app and then bought the masters edition app. Next we had to have the masters edition card game and we play it like 3 times a week everytime we hang out.

Excellent modified version of Phase 10. Makes it so you have to think about not only getting the phase, but you have to strategically pick which phase you want to do. Get the hard ones out of the way first and risk getting locked out that round, or do the simple phases and risk getting stuck later on.

This is one of our favorite family games. Suitable for kids 8+ and adults have just as much fun. This way the whole family can play. See all 98 customer reviews...
